

Cohesive Kraft Linerboard

*Protective packaging material
that provides excellent rigidity,
corner and surface protection!*

Pack & Guard™ Cohesive Linerboard

What happens when you are stuck between a rock and a hard place, or in our case stuck between using cohesive single face and cohesive paper for your packaging application? See cohesive single face provides excellent cushioning, while cohesive papers provides excellent containment for your product. So how can you accomplish the best of both worlds in one product? SFS has the answer with our line of cohesive linerboard products. The extra heavy paper weight of linerboard provides increased rigidity, corner and surface protection versus standard cohesive papers. Pack & Guard™ Cohesive linerboard is a great product for book or literature packaging as it provides excellent corner protection during shipping and handling. Contact us for more information and samples today!
